SUMMARY

The following information is presented as a summary of certain terms of the Company and prospective members should refer to the balance of this memorandum for more complete information and should not rely solely on this information contained in this summary. This summary is qualified in its entirety by the detailed formation appearing elsewhere in this memorandum.

The Company (Fund)

NEW HEDGE FUND US LLC is a Delaware limited liability company (the "Company") formed on the **7th of June 2015**. The Company is being operated as a private investment fund under Section 3(c)(1) of the Investment Company Act of 1940, as amended (the "Act").

Manager (Managing Member)

The Manager of the Company is **Investment Manager LLC**, a **Delaware** company (the "Manager"). The Manager will have exclusive control over day-to-day operations of the Company even if additional Managers are admitted to the Company in the future. The principal office of the Company and the Manager is **address, city, state, zip**.

Investment Management Company

Investment Manager LLC, who is also the Fund Manager, will serve as the Investment Manager of Company and provides discretionary investment advisory and portfolio management services to the Company (the "Investment Manager"). The Investment Manager is not currently registered with the Securities and Exchange Commission (SEC). However, the Investment Manager intends to engage registered investment advisors to comply with recent changes to the U.S. Securities Regulations or will complete the registration process if required.

General Investment Philosophy

The Company is primarily a long investor on U.S. and foreign equity markets; funds focused on energy and minerals; and U.S. governmental & Infrastructure projects. The Company's focus is on long-term investing as opposed to short-term trading, and its primary investment vehicles will be securities of large to small capitalized companies. The Company expects to make investments in securities, other funds, and private equity. The Company's goal is to generate outstanding returns on a rolling 24-36 month time horizon through the use of fundamental research across multiple industry sectors in order to generate an edge of insight or factual information. Once such information is obtained, the Company will determine if the information will put a company or an industry in a position to achieve success. Companies showing strong attributes will be considered for investment. Depending on the market environment, the Company's portfolio may be hedged at times using short sales of stocks and other derivative securities.

Suitability

This offering is not registered under the Securities Act of 1933, as amended (the "Act"), as is being made in reliance on the exemptions

RISK FACTORS

AN INVESTMENT IN THE COMPANY IS SPECULATIVE, INVOLVES A HIGH DEGREE OF RISK AND IS SUITABLE ONLY FOR PERSONS WHO ARE ABLE TO ASSUME THE RISK OF LOSING THEIR ENTIRE INVESTMENT. PROSPECTIVE PURCHASERS OF INTERESTS SHOULD CAREFULLY READ THE ENTIRE MEMORANDUM. BECAUSE THE INVESTMENT PROGRAM INVOLVES SUBSTANTIAL RISKS, AN INVESTMENT IN THE INTERESTS SHOULD BE MADE ONLY AFTER CONSULTING WITH INDEPENDENT QUALIFIED SOURCES OF INVESTMENT AND TAX ADVICE. PROSPECTIVE INVESTORS SHOULD CAREFULLY CONSIDER THE FOLLOWING RISKS, AMONG OTHERS, BEFORE SUBSCRIBING FOR INTERESTS.

Prospective investors should carefully consider the risks involved in an investment in the Company, including but not limited to those discussed below. Many of these risks are discussed more fully elsewhere in this Memorandum. Prospective investors should consult their own legal, tax, and financial advisers as to all these risks and an investment in the Company generally.

General

Reliance on the Investment Manager. The success of the Company depends on the ability of the Investment Manager to develop and implement investment strategies to achieve the Company's investment objectives. The Company's investment performance could be materially adversely affected if [Managers Name](#) ceases to be involved in the active management of the Company's portfolio. The Investment Manager has wide latitude in making investment decisions and investors have no right or power to take part in such decisions.

Operating Deficits. The expenses of operating the Company could exceed its income. This would require that the difference be paid out of the Company's capital, reducing the Company's investments and potential for profitability.

Limited Operating History. The Company, [NEW HEDGE FUND US LLC](#), has no operating and investing history upon which potential investors may evaluate past performance. The past investment performance of the Investment Manager and its principal and affiliates is not indicative of the future investment results of the Company. There can be no assurance that the Company will achieve its investment objectives.

Investment Risks

All securities investing and trading activities risk the loss of capital. While the Investment Manager will attempt to moderate these risks, there can be no assurance that the Company's investment activities will be successful or that Members will not suffer losses. An investment in the Company is suitable only for persons who have adequate means of providing for their current needs and personal contingencies and have no need for liquidity in their investments. An investment in the

Company should not be made by any person who (i) cannot afford a total loss of principal, or (ii) has not (either alone or in conjunction with a financial advisor) carefully read or does not understand, this Memorandum, including (but not limited to) the portions concerning the risks and the income tax consequences of an investment in the Company. The following discussion describes some of the more significant risks associated with the Company's proposed activities.

Overall Investment Risk. All securities investments risk the loss of capital. The nature of the securities to be purchased and traded by the Company and the investment techniques and strategies to be employed by the Investment Manager may increase this risk. While the Investment Manager will devote its best efforts to the management of the Company's portfolio, there can be no assurance that the Company will not incur losses. Many unforeseeable events, including actions by various government agencies, and domestic and international economic and political developments, may cause sharp market fluctuations that could adversely affect the Company's portfolio and performance.

Transactions in Securities. There is no assurance that the Investment Manager will correctly evaluate the nature and magnitude of the various factors that could affect the prospects of the securities in which the Company invests. The Company may lose its entire investment or may be required to accept cash or securities with a value less than the Company's original investment. Under such circumstances, the returns generated from the Company's investments may not compensate the Members adequately for the risks assumed.

Concentration of Investments. The Company is not limited with respect to the amount of capital which may be committed to any one investment. Accordingly, the Company may from time to time hold a few (or even one), relatively large (in relation to its capital) securities positions, with the result that a loss in any one position could have a more material adverse impact on the Company's capital than would a loss position in a more diversified portfolio.

Leverage. Leverage is the use of borrowed funds for investment. To the extent the Company purchases securities with borrowed funds, its net assets will tend to increase or decrease at a greater rate than if borrowed funds are not used. If the interest expense on borrowings were to exceed the net return on the portfolio securities purchased with borrowed funds, the Company's use of leverage would result in a lower rate of return than if the Company were not leveraged. If the amount of borrowings which the Company may have outstanding at any one time is large in relation to its capital, fluctuations in the market value of the Company's portfolio will have a disproportionately large effect in relation to its capital and the possibilities for profit and the risk of loss will therefore be increased. Any investment gains made with the additional monies borrowed will generally cause the value of the Company's assets to rise more rapidly than would otherwise be the case. Conversely, if the investment performance of the additional monies fails to cover their cost to the Company, the value of the Company's assets will generally decline faster than would otherwise be
